### **REASONS FOR ALLOWANCE**

1. The following is an examiner's statement of reasons for allowance:

Applicant's amendment filed on 9/12/2005 has been carefully considered.

Claims 10 and 12-23 have been amended as suggested by the examiner in telephonic interviews on August 19, 2005 and August 22, 2005. Claims 10 and 12-23 have been amended to clearly define a method of the invention as shown in figures 3 and 5 of the specification.

The references of the record either taken alone or in combination fail to teach or suggest the method of selecting said BEMF value for said machine, wherein said BEMF value is selected at a first machine speed having a line-to-line peak voltage that is equal to a desired terminal voltage of said machine, said BEMF value having substantially equal amplitude to said desired terminal voltage at said first speed and wherein an electrical phase difference between said BEMF value and said terminal voltage is approximately zero. The references of the record either taken alone or in combination fail to teach or suggest selecting said machine inductance value for said machine, wherein said machine inductance value is selected based upon both a machine reactance value and a frequency value as a function of a proportional increase in said selected BEMF value between said first machine speed and a second machine speed, wherein the terminal voltage and a phase current are in phase.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
